

Techniques of Tablet Weaving

by Peter Collingwood

Contents

Foreword

1. Historical Introduction

1. *Introduction to Tablet Weaving*

2. *History*

A. Earliest Tablet Weaving B. Chronological List of Tablet Weaving Before A. D.1000 C. Written Evidence
D. Rediscovery of Tablet Weaving

2. Introduction of Terms Used

3. Equipment

1. *Tablets*

A. History B. Materials C. Shape and Size D. Labelling of Tablets E. Number of Tablets Used F. Nomenclature
G. Kokonoe

2. *Methods of Warp Tensioning*

A. History B. Stretching Warp Between Weaver and a Fixed Point: The Weaver-Tensioned Warp C. Stretching Warp Between Two Fixed Points D. Gravity-Tensioned Warp

3. *Beater*

4. *Comb*

5. *Shuttle*

4. Yarns

5. Warping

1. *Threading Diagrams*

2. *Methods of Warping*

A. Using Cut Lengths of Warp B. Drawing Warp Through Individual Tablets C. Drawing Warp Through Whole Pack: 'Continuous Warping' D. Variations

6. Threading and Manipulation of the Tablets

1. *Threading Direction*

2. *Turning the Tablets*

A. Nomenclature B. Degree of Turning C. Relation of Threading and Turning Direction to Warp-Twining Direction
D. Methods of Reversing the Warp-Twining Direction
E. Turning Considered in Detail F. Aids to Turning

3. *Twisting about Vertical, Horizontal and Diagonal Axis*

7. Starting, Finishing and Varying the Width of a Band

1. *Starting a Band*
 - A. Inserting the Weft B. Using the Beater
 - C. Warp Tension D. Beginning With a Loop
2. *Varying the Width of a Band*
3. *Finishing a Band*

8. Warp-Twined Bands and Their Characteristics

1. *Introduction*
2. *Warp-Twined Cords*
 - A. Structure of the Cords B. Appearance of the Cords
 - C. Colour Sequence in the Cords D. Reversal of Twining Direction
3. *Dealing with Warp Twist beyond the Tablets*
 - A. Eliminating the Twist B. Making Use of the Twist

9. Warp-Twined Bands with all Cords Equally Twined between Successive Picks

1. *Twining Direction of all Cords reversed only when Build-up of Twist beyond the Tablets makes it Imperative*
 - A. With Four Threads per Tablet B. With Two Threads per Tablet C. With Three Threads per Tablet D. With Six Threads per Tablet E. With Eight Threads per Tablet
2. *Twining Direction of all Cords Frequently Reversed*
3. *Twining Direction Reversed only in Some Cords*
 - A. Introduction B. With a Multi-Coloured Warp
 - C. With a One-Colour Warp

10. Warp-Twined Bands With All Cords Not Equally Twined Between Successive Picks

1. *Half the Cords not Twined between Successive Picks*
 - A. With Four Threads Per Tablet B. With Two Threads Per Tablet C. With Three Threads Per Tablet
2. *A Varying Number of Cords Not Twined between Successive Picks*
 - A. Making Raised Ridges and Blocks B. Moving From One Motif to Another C. Threads From Idling Tablets Floating on Only One Surface of the Band D. Idling Tablets Giving Wide Diagonal Stripes of Colour
 - E. Majority of Tablets Idling
3. *All the Cords Twined between Successive Picks, but Some more than Others*
 - A. Weftway Grooves B. Moving From One Motif to Another C. Two-Strand Warp Twining With Whole and Half Turns of the Tablet D. Four-Strand Warp Twining With Half and Quarter Turns of the Tablets

11. Bands Whose Structure is Predominantly Plain Weave, Hopsack, Gauze or Twill

1. *Warp-Faced Plain Weave and Hopsack*
 - A. Plain Weave and Hopsack
 - B. Hopsack with Warp Floats in Brick Formation
 - C. Plain Weave and Hopsack, Combined with Floats on Both Sides of the Band
 - D. Hopsack Combined with Floats on One Side of the Band and with Areas of Warp Twining
 - E. Areas of Plain Weave and Warp Floats
 - F. Warp-Faced Plain-Weave Double Cloth
 - G. Triple Cloth
2. *Gauze Weave*
3. *Twills*
4. *Other Weaves*

12. Bands Whose Structure is a Double-Faced Weave Based on 3-Span Warp Floats in Alternate Alignment

1. *Introduction*
2. *General Technique*
3. *Interchanging Colours*
4. *Practical Points*
5. *Different Structural Types of the Double-Faced Weave*
 - A. Tablets Alternately S- and Z-Threaded
 - B. All Tablets Threaded in the Same Direction
 - C. Working with Half Turns Between Picks
 - D. Using Two S-Threaded and Two Z-Threaded Tablets Alternately
 - E. Using Six-Holed Tablets
 - F. Using Two Threads Per Tablet
 - G. Double-Faced 3/1 Broken Twill
 - H. 3/1 Broken Twill

13. Weft-Patterning of Tablet-Woven Bands

1. *Ground Weft coming to the Surface by Manipulating the Shuttle, The Tablets and by using Special Tablets*
2. *Extra Weft Decorating the Surface: Brocading*
 - A. Introduction
 - B. Methods of Tying Down the Brocading Weft
 - C. Treatment of Brocading Weft at the Selvages
 - D. Ground Weave
 - E. Materials Used for Brocading
 - F. Warp Forming Motifs Above the Brocading Weft
3. *Other Methods of Weft Patterning*
 - A. Weft Wrapping and Weft Twining
 - B. Tapestry

14. Using an Extra Non-Twining Warp

1. *Using the Extra Warp to give a Warp Pile*
 - A. Introduction
 - B. Technique
 - C. Two-Colour Designs
 - D. Binding in the Pile Warp More Securely
 - E. Pile on One Surface Only
2. *Using the extra Warp to give Floats*

15. Special Warp and Weft Manipulations Unrelated to the Weave Structure

1. Weft Manipulations

- A. Multiple Wefts
- B. Preventing the Weft Showing at the Selvage
- C. Omitting Wefts
- D. Weaving a Tube
- E. Weft Fringes Starting Borders
- F. Finishing Borders

2. Warp Manipulations

- A. Transposing Warp
- B. Twisting the Long Axis of the Band
- C. Tubular and Two-Layered Fabrics
- D. Using a Core Warp Thread
- E. Knotting on New Warp Threads

16. Other Possibilities

17. Ways of Producing a Warp Twined Structure Without Tablets

- 1. Ply-Split Darning*
- 2. Loop Manipulation*
- 3. Aya-Take-Dai*
- 4. Mam-Dai*
- 5. Manipulation of Stretched Threads*
- 6. Throwing Warp across the Weft*
- 7. Methods used in Passementerie*
- 8. Industrial Methods*

Appendix 1 Techniques Classified by Threading

Appendix 2 Tablet Weave Demonstrator

Appendix 3 The So-Called Rameses Girdle
